WORK EXPERIENCE

(May 2026 – July 2026)

React Developer Intern | Digital Base, Yangon

Mari Salon Booking & Staff Management System

React, RTK Query, Ant Design, Tailwind CSS

- Interactive Operations: Built a real-time staff schedule tracking and interactive calendar system with Day.js and Ant Design.
- Optimized Data Layer: Integrated RTK Query with tag invalidation for automated cache management and instant UI synchronization.
- Complex Business Logic: Managed multi-status staff tracking (Available, Terminated) and dynamic user search with debounce optimization.
- Collaborated with senior developers to translate UI/UX wireframes into clean, responsive React components using Tailwind CSS.
- Gained practical experience in git workflows, debugging, and cross-functional team communication.

CERTIFICATIONS

Meta JavaScript Professional Certificate

Coursera / Meta | 2026

Meta Python Programming Certificate

Coursera / Meta | 2026

FEATURED PROJECTS

Apex Academy

React, Tailwind CSS, GSAP

Built a responsive and animated educational platform based on dual UI/UX design concepts. Partnered with UI/UX designer to translate distinct Figma concepts into functional frontend interfaces. Implemented complex, fluid animations using GSAP alongside utility-first Tailwind CSS.

PERSONAL PROJECTS

E-commerce Website & Admin Dashboard

React, Tailwind CSS, Supabase, Telegram API

- Developed a fully responsive e-commerce store with an intuitive product catalog and cart functionality.
- Built a comprehensive Admin Dashboard to manage inventory, track products, and handle CRUD operations smoothly using Ant Design components.
- Integrated Supabase for secure database management and user authentication.
- Connected a Telegram Bot to automatically notify admins in real-time when new orders are placed.

Real-time Typing Speed Practice Application

Vanilla JavaScript, DOM Manipulation, Firebase

- Built a web application for tracking typing speed (WPM) and accuracy with real-time feedback and a competitive leaderboard.
- Integrated Firebase for data persistence and user authentication.

CORE SKILLS

- JavaScript (ES6+)
- HTML5 & CSS3
- React
- TypeScript
- Nextjs
- Redux Toolkit
- Tailwind CSS
- Ant Design (Antd)
- Responsive Design

ADDITIONAL TOOLS

- Git & GitHub
- Firebase
- Supabase
- RESTful APIs
- UI/UX Enhancements
- Ubuntu Linux

LANGUAGES

- Burmese (Native)
- English (Proficient / Technical Contexts)
